About Me

Let me tell you a few things...

I am hard working and dedicated to achieving targets and make it my responsibility to

learn more than is expected to over achieve in any environmentI'm exposed to.

I am confident,outgoing and enjoy meeting and dealing with different people.

I believe that I have the ability to make decisions, which are effective and efficient

and in line with what needs to be achieved. Planning and coordinating of events

and tasks is of utmost importance, as I believe that without a routine or

time management, a task will never be completed properly.

I am a team player, have a keen sense of urgency, high energy level and

extremely progressive in attitude. I am flexible and not deterred by obstacles.

Looking for a company which will challenge my problem solving skills and

allow me to continue to develop my knowledge and potential.
